DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 rejected under 35 U.S.C. 102(b) as being anticipated by US 4,773,299.

US'299 discloses an apparatus that includes a loading tube 84 for a perforating gun 42 comprising: cups 70 forming cup cavities for enclosing an explosive charge within each of the cups; and ridges forming valleys therebetween. Though not specifically labeled "ridges and valleys", they are clearly shown (in 86) in Figure 5. With respect to claim 2, each cup cavity matches the charge profile.

3. Claims 1, 2, 8, 9, 12, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,191,265.

US'265 discloses an apparatus that includes a loading tube 20, 20' for a perforating gun 10 comprising: cups forming cup cavities 21 for enclosing an explosive charge 22 within each of the cups; and ridges forming valleys therebetween. Though not specifically labeled "ridges and valleys", they are clearly shown in Figure 4. With respect to the depending claims, the reference teaches the limitations as claimed including each cup cavity matches the charge profile, the loading tube constructed of formed plastic, or polystyrene.

Allowable Subject Matter

4. Claims 3-7, 10, 11, and 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 18-29 are allowed.

Response to Arguments

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
